

Fujiyama Power Systems Ltd.

Company Overview:

Fujiyama Power Systems Ltd. (FPSL) manufactures products and provides solutions in the roof-top solar industry including on-grid, off-grid, and hybrid solar systems under its two brands 'UTL Solar' and 'Fujiyama Solar'. The company has an extensive product portfolio of more than 522 SKUs which includes a full range of solar inverters, solar panels and batteries. FPSL operates 4 manufacturing facilities across Northern India with an available installed capacity of manufacturing 6,56,547 solar panels, 3,87,504 solar inverters and UPS, 3,09,504 e-Rickshaw chargers and 7,488 lithium-ion batteries as of FY25.

Key Highlights:

1. Diversified product portfolio: The company offers an extensive range of products including solar PCUs, solar off-grid, on-grid and hybrid inverters, solar panels, battery chargers, lithium-ion and tubular batteries, online UPS systems, offline UPS systems, solar management units and solar charge controllers. Furthermore, the company also provides chargers for 3W e-rickshaws and lithium-ion batteries in the EV segment. The diversified product portfolio helps meet varied industry demand and ensures resilience against market fluctuations. In FY25, FPSL had ~15.5% market share in the total Indian solar battery market.

2. Strong R&D capabilities: FPSL boasts of having a proven track record of being an early adopter of innovative technology and implementing manufacturing processes resulting in enhanced efficiency and product quality. It has been one of the few companies in India to develop online UPS with single card, combo UPS along with AVR, high frequency online UPS and single card SMT inverter. As of Jun'25, the company has more than 65 R&D professionals and 500 qualified engineers. FPSL holds a patent for an indigenously developed rMPPT technology which optimizes solar output to harness more solar energy from the same solar panels. The strong R&D capabilities helps introduce new products to meet evolving landscape of the solar energy industry.

3. Wide distribution network: The company has a comprehensive pan-India distribution network of 725 distributors, 5,546 dealers and 602 service engineers. It also offers products through its 1,100 exclusive UTL Solar 'Shophe' franchise network where customers are educated on selecting the right rooftop system and components from a single source, ensuring seamless procurement and professional installation. The Shoppe engineers and sales collection managers are trained by the company across the distribution network.

4. Expansion plan: FPSL plans to establish an integrated project for the manufacturing of solar inverter, solar panels and lithium-ion batteries in Ratlam, Madhya Pradesh. The new manufacturing facility would enable the company to meet the growing demand from western and southern regions of India and increase production capacity by 2 GW i.e. 2 GW each for solar panels and solar inverters and 2 GWh for lithium-ion batteries. The facility is expected to be completed by FY26.

Valuation: FPSL is a leading provider of roof-top solar equipment and solutions especially in North India. Tailwinds such as the PM Surya Ghar Muft Bijli Yojana and the impending capacity expansion are expected to drive growth for FPSL. At the upper price band of Rs 228, the company is valued at FY25 P/E multiple of 44.7x on post-issue capital.

Issue Details	
Date of Opening	13 th November 2025
Date of Closing	17 th November 2025
Price Band (Rs)	216 – 228
Issue Size (Rs cr)	828
Fresh Issue (Rs cr)	600
Offer for Sale (Rs cr)	228
No. of shares (@ upper band)	3,63,15,789
Face Value (Rs)	1
Post Issue Market Cap (Rs cr)	6,650 – 6,986

Risk Factors

- **Operational risk:** The company currently operates 4 manufacturing facilities in North India. Geographical concentration of its manufacturing facilities exposes the company to region specific risks that could adversely affect business operations.
- **Supply chain disruption:** FPSL imports a significant part of its raw material from China and import equipment & machinery from other foreign countries. Any supply chain disruptions emanating from regulatory or import restrictions may delay business operations.
- **Distribution risk:** Inability to maintain or further expand its retail as well as franchisee network could negatively impact the company's distribution network.
- **Revenue concentration:** FPSL derives a substantial portion of its retail sales (~42%/36% in 1QFY26/FY25) from Uttar Pradesh. Any adverse change in the demand of products in Uttar Pradesh or failure to expand into new markets may have an adverse impact on the business.

Growth Strategies

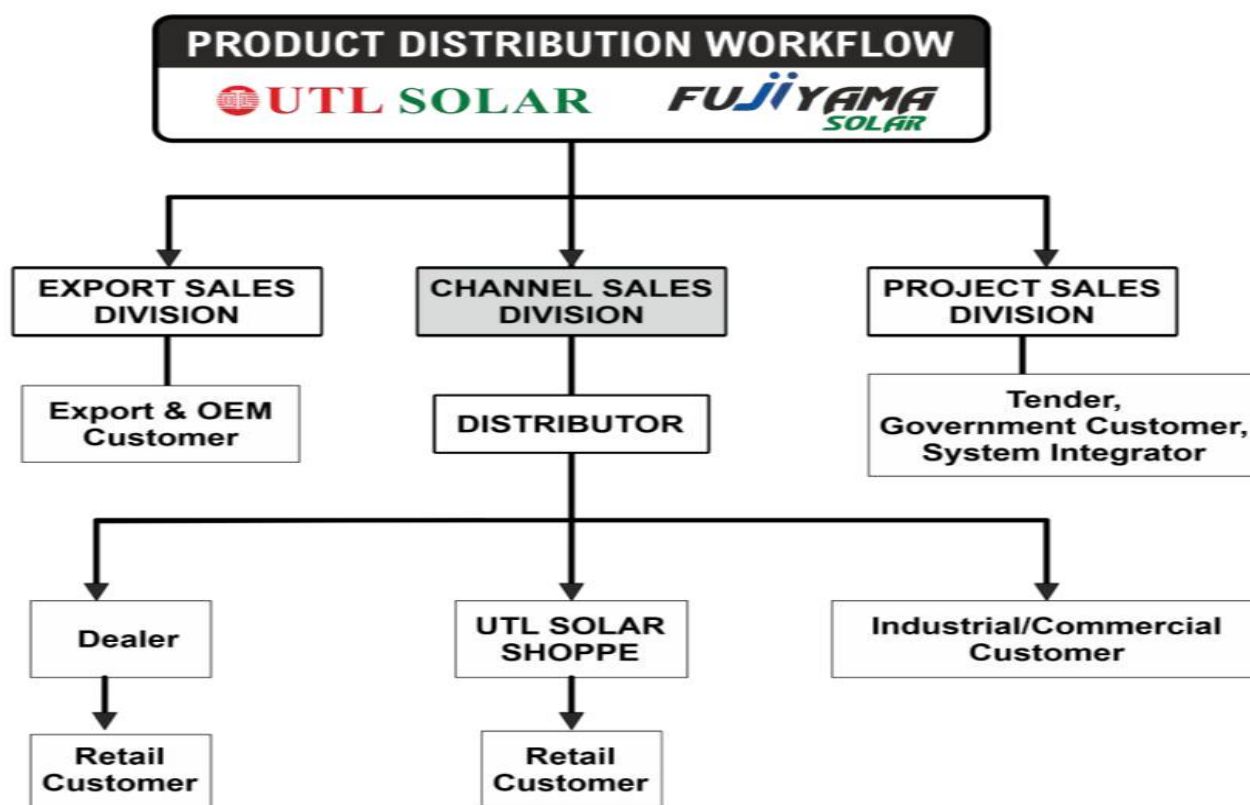

- Expand the manufacturing base for solar panels, inverters & batteries and strengthen back-end integration in solar panels.
- Further strengthen domestic distribution and retail network and increase export sales.
- Invest in R&D capabilities and develop more efficient product offerings.
